

Correction numération – CM2

Décompose ces fractions comme dans l'exemple :

$$\frac{156}{100} = 1 + \frac{5}{10} + \frac{6}{100}$$

$$\frac{234}{100} = 2 + \frac{3}{10} + \frac{4}{100}$$

$$\frac{21}{10} = 2 + \frac{1}{10}$$

$$\frac{167}{10} = 16 + \frac{7}{10}$$

$$\frac{805}{100} = 8 + \frac{5}{100}$$

$$\frac{78}{100} = \frac{7}{10} + \frac{8}{100}$$

$$\frac{906}{100} = 9 + \frac{6}{100}$$

$$\frac{45}{100} = \frac{4}{10} + \frac{5}{100}$$

$$\frac{4\,005}{1\,000} = 4 + \frac{5}{1\,000}$$

Recompose comme dans l'exemple :

$$7 + \frac{3}{10} + \frac{8}{100} = \frac{738}{100}$$

$$88 + \frac{1}{10} + \frac{4}{100} = \frac{8814}{100}$$

$$48 + \frac{9}{100} = \frac{4809}{100}$$

$$32 + \frac{5}{1\,000} = \frac{32\,005}{1\,000}$$

$$327 + \frac{1}{100} + \frac{6}{1\,000} = \frac{327\,016}{1\,000}$$

$$2 + \frac{92}{100} = \frac{292}{100}$$

Exercice manuel p 31 n°5 :

$$4 = \frac{40}{10} = \frac{400}{100} = \frac{4\,000}{1\,000}$$

$$15 = \frac{150}{10} = \frac{1\,500}{100} = \frac{15\,000}{1\,000}$$

$$204 = \frac{2\,040}{10} = \frac{20\,400}{100} = \frac{204\,000}{1\,000}$$
