

Correction numération exercice 4 – CM1

$$\frac{328}{100} = \frac{300}{100} + \frac{20}{100} + \frac{8}{100} = 3 + \frac{2}{10} + \frac{8}{100}$$

$$\frac{582}{100} = \frac{500}{100} + \frac{80}{100} + \frac{2}{100} = 5 + \frac{8}{10} + \frac{2}{100}$$

$$\frac{784}{100} = \frac{700}{100} + \frac{80}{100} + \frac{4}{100} = 7 + \frac{8}{10} + \frac{4}{100}$$

$$\frac{625}{100} = \frac{600}{100} + \frac{20}{100} + \frac{5}{100} = 6 + \frac{2}{10} + \frac{5}{100}$$

$$\frac{4\,366}{1\,000} = \frac{4\,000}{1\,000} + \frac{300}{1\,000} + \frac{60}{1\,000} + \frac{6}{1\,000} = 4 + \frac{3}{10} + \frac{6}{100} + \frac{6}{1\,000}$$

$$\frac{8\,463}{1\,000} = \frac{8\,000}{1\,000} + \frac{400}{1\,000} + \frac{60}{1\,000} + \frac{3}{1\,000} = 8 + \frac{4}{10} + \frac{6}{100} + \frac{3}{1\,000}$$
